The Impact of Partnerships:

Curriculum, Construction & Community in Sync

Join us for this landmark event bringing together key stakeholders—including school district leaders, educators, architects, general contractors and material suppliers—to advance the development of sustainable schools designed as a living learning laboratory. Focused on the groundbreaking IMPACT Center for Leadership & Innovation—combining a FranklinCovey leadership-based curriculum with project-based learning—attendees will hear directly from the organizations that brought it to life and will leave with actionable ideas in school curriculum, construction and cost savings.

Dates & Location

October 21-23, 2025

National Corvette Museum
350 Corvette Drive
Bowling Green, Kentucky

Cost to Register: \$50

More About this Event:

Development of the IMPACT Center represents more than just the construction of a building; it is a bold commitment to reimagining educational spaces as dynamic environments that foster innovation, environmental stewardship and hands-on learning. Through intentional collaboration, this project aims to create a model for future-ready schools that are not only energy-efficient and environmentally responsible but also serve as active teaching tools for students and the broader community.

The event will feature presentations from project partners, interactive exhibits, site tours and opportunities for dialogue around:

- Sustainable design and construction practices that reduce operational costs while enhancing energy efficiency
- Integrating curriculum with innovative spaces
- Cutting-edge techniques and technologies that design teams can incorporate into school projects
- Community engagement and partnerships
