## PRODUCT DESCRIPTION

The 4" (100 mm) Heavy Duty Tape is specifically designed to protect the interlock at the top of the wall from concrete infiltration during the concrete pouring process. This durable tape ensures the integrity of the wall interlocks by sealing the top of the wall, keeping the construction process clean and efficient.

---

## BASIC USES

Nudura's Heavy Duty tape is installed at the top of the ICF form walls to cover the interlock system during the concrete placement process. It prevents concrete from entering the interlock, ensuring proper functionality of the wall's structure.

---

## FEATURES & BENEFITS

- Designed for high durability and strong adhesion, it withstands the rigors of concrete placement and securely adheres to the interlock, maintaining a firm hold throughout the pour.
- Providing optimal protection, it effectively prevents concrete infiltration, preserving the integrity of the interlock system.
- With easy application, it is simple to apply, reducing preparation time and increasing efficiency on-site.

---

## AVAILABILITY

The Heavy Duty Tape is available from your local Nudura distributor. For Distributor locations, visit <https://www.nudura.com/>

---

## APPLICATION

For best results, ensure surfaces are clean and dry before applying the tape.

---

## PACKAGING

- Dimensions: 4" x 72 yards (96 mm x 66m)
- Quantity per box: 24 rolls

---

## STORAGE

Store the Heavy Duty Tape in their original, undamaged, packaging in a clean, dry location away from direct sunlight.
