

HERCUWALL™ FOR GENERAL CONTRACTORS

Accelerated construction timelines with smaller,
less experienced crews.

Product Overview

Bring a faster, better building strategy to the table. HercuWall™ is the insulated concrete panel system that eliminates costly and time-consuming steps. Fabricated off site and delivered ready to assemble, HercuWall delivers R31 insulation that provides significant energy savings over the life of a home compared to traditional building methods.

HercuWall is a material cost-competitive alternative to traditional building methods such as wood frame, CMU block and steel framing.

1	Concrete
2	ShearStrip™
3	Polyester Weather-Resistant Film
4	Insulating Foam (EPS)

Features & Benefits

- We consult with you to value engineer and optimize utilization of HercuWall within your existing plans.
- Proprietary software converts your plans to HercuWall shop drawings used to manufacture precisely sized and cut panels, limiting onsite decision making.
- Each panel is numbered and delivered to the site in order, ready to install.
- You get peace of mind with our in-person technical and training assistance.
