

## PRODUCT DESCRIPTION

The 4" (100mm) Protective Tape is designed to protect the interlock at the top of the Nudura Insulated Concrete Form (ICF) wall during concrete placement. The Protective Tape ensures the integrity of the form interlock by sealing it from concrete, keeping the construction process clean and efficient. This process is specially important when the ICF wall will be continuing above.

---

## BASIC USES

Nudura's Protective tape is applied over the interlock at the top of the wall to prevent concrete from flowing into the sockets. By maintaining the integrity of the interlock system, it ensures a cleaner and easier way to continue the ICF wall after the concrete placement.

---

## FEATURES & BENEFITS

- Effectively prevents concrete intrusion into the interlock during concrete placement.
- Provides a cleaner and easier method for continuing the ICF wall after the concrete placement.

---

## AVAILABILITY

The Protective Tape is available from your local Nudura Distributor. For Distributor locations, visit <https://www.nudura.com/>.

---

## APPLICATION

For best results, ensure surfaces are clean and dry before applying the tape.

---

## PACKAGING

- Dimensions: 4" x 72 yards (96 mm x 66m)
- Quantity per box: 18 rolls

---

## STORAGE

Store the Protective Tape in their original, undamaged packaging in a clean, dry location away from direct sunlight and extreme temperatures.
