
PRODUCT DESCRIPTION

The Retrofit Bracket is an efficient solution for securely connecting wood floor joists or facilitating wood roof connections to a Nudura wall. Designed for post-concrete placement, this bracket ensures structural integrity by providing secure attachment after the concrete has been placed and cured.

BASIC USES

- Provides a secure connection for wood floors and wood roofs in ICF structures.
- Used when modifications or corrections are needed after the concrete has been set.
- Works in conjunction with the Stamped Bearing Bracket to facilitate attachment to the concrete.

Availability

The Retrofit Bracket is available from your local Nudura distributor. For Distributor locations, visit <https://www.nudura.com/>.

FEATURES & BENEFITS

- The Retrofit Bracket offers a correction solution for improper installations of the ICF Hanger Insert Plates. The Post-concrete placement capability allows for adjustments after the concrete has cured.
- Maintains structural integrity by providing a secure and reliable attachment point.
- Improves labor efficiency by eliminating the need for extensive modifications.

PACKAGING

There are 12 pieces in a box.

STORAGE

Store the Retrofit Bracket in their original, undamaged packaging in a clean, dry location.

Please refer to our website at www.nudura.com for the most up-to-date Product Data Sheets.

NOTE: All Nudura Safety Data Sheets (SDS) are in alignment with the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) requirements.
