### PRODUCT DESCRIPTION

The V-Clip is a pre-bent galvanized steel wire designed for connecting Nudura unassembled panels to a concrete floor. Each V-Clip features 1 ½" (38 mm) long prongs at both ends of the 'V' to slide into the web capture lugs on Nudura's unassembled form panel. The point of the 'V' is securely fastened to the concrete floor slab or deck pan.

---

### BASIC USES

The primary purpose of the V-Clip is to secure the free end of Nudura's unassembled standard panels in place where a connection to a concrete precast floor is expected. While the V-Clip can be used in various scenarios, it is best effective in commercial construction and situations where concrete floor decks are being used in conjunction with Nudura.

---

### FEATURES & BENEFITS

This accessory allows contractors to provide structural support to the panel without the need for additional materials on the outside of the wall.

---

### AVAILABILITY

The V-Clip is available from your local Nudura distributor. For distributor locations, visit <https://www.nudura.com/>

---

### PACKAGING

The V-Clip is packaged 250 pieces in a durable cardboard box.

---

### STORAGE

Store the V-Clips in their original, undamaged packaging in a clean, dry location.
